General Information

Journal references in Mathematical Reviews (MR) appear in the following form: *J. Utopian Math. Soc.* (6) **5(56)** (1991/92), *no.* 2, 18–53 (1993), where, after the abbreviated title, one has: (series number) volume number(volume number in first series, if given) (nominal date), issue number if given, first page–last page (imprint date). If only one date is given, it is the nominal date and follows the volume number. If no volume number is given, the year is used in its place. The symbol ★ precedes the title of a book or other nonperiodical that is being reviewed as a whole; the symbol Ⓥ precedes the title of a videocassette. If an issue of a journal is to be reviewed as a whole and an ad hoc title is devised for this purpose then this title appears in braces { }. Articles that have been accepted for publication in certain important journals are now reviewed in MR from the final manuscript; the symbol ○ at the end of a review denotes such an item.

References to reviews in Mathematical Reviews before Volume 20 (1959) are by volume and page number (e.g., MR 18, 122); from Volume 20 to Volume 58 (1979), by volume and review number (e.g., MR 20 #4185 or MR 23 #A513); from 1980 on, by issue and review number (e.g., MR 80a:46017). References to reviews in Jahrbuch über die Fortschritte der Mathematik and Zentralblatt für Mathematik are by volume and page number for the period before 1972 (e.g., Jbuch 50, 173; Zbl 29, 323) and by volume and review number since 1972 (e.g., Zbl 218:46017). Reviews reprinted from Applied Mechanics Reviews, Computing Reviews, Mathematics of Computation, Physics Abstracts, Referativnyi Zhurnal Matematika (Mekhanika, etc.), or Zentralblatt für Mathematik are identified by AMR, CR, MC, PA, RZhMat (RZhMekh, etc.), or Zbl, respectively, in parentheses following the reviewer's name.

Authors' names are given as listed in the item being reviewed. In order to identify each author uniquely, MR has assigned to certain authors' names an identifying form of the name. Superscript numbers are used in identifying forms where necessary. The identifying form is added in brackets following the published name.

Most review headings include institution codes. An institution code, indicating the author's address as listed in the reviewed item, consists of two [or three] parts separated by hyphens (e.g., 1-MR [or F-LYON-P]); these parts designate the country, the university or institution [and the department]. The absence of a department code usually indicates Department of Mathematics. Institution codes are also used to indicate the reviewer location for some reviewers. A list of codes appears in the most recent Annual Index of Mathematical Reviews.

Editorial Office: MR is a publication of the American Mathematical Society; it is edited at the University of Michigan in Ann Arbor. All editorial correspondence should be addressed to Mathematical Reviews, 416 Fourth Street, PO Box 8604, Ann Arbor, MI 48107-8604, USA; it may also be sent electronically via Internet to MATHREV@MATH.AMS.ORG or by FAX to (313) 996-2916. All other correspondence should be addressed to the American Mathematical Society, PO Box 6248, Providence, RI 02940-6248, USA. Orders should be addressed to the American Mathematical Society, PO Box 5904, Boston, MA 02206-5904. *All orders must be accompanied by payment.*

Subscription information: Prices for MR for the year 1993, including the annual index, are $4591 list, $3673 institutional member, $561 individual member ($611 outside the US), $377 reviewer ($427 outside the US). Combination paper and microfiche subscriptions are $6106 list, $4885 institutional member. Nonindividual subscribers outside the United States and India must pay a postage surcharge of $60; nonindividual subscribers in India must pay a postal surcharge of $153. Expedited delivery to destinations in North America $108; elsewhere $379. A late charge of $200 will be billed for orders received from nonmembers after January 1 of the subscription year.

Back volumes information: Back issues are available for all volumes of MR; price information can be obtained from the American Mathematical Society, PO Box 6248, Providence, RI 02940-6248. Back volumes are also available in microform from University Microfilms International, 300 North Zeeb Road, Ann Arbor, MI 48106-1346.

Cumulative indexes: There are sets of cumulative author and subject indexes that cover the entire span of MR from 1940–1984.

There are several other services that are of interest to users of MR:

- Current Mathematical Publications (CMP) provides an early announcement of books, collections and research articles in the mathematical sciences, many of which will be reviewed in MR.
- MathSci is the electronic version of CMP and MR; it also contains additional listings of items in statistics and computer science. It is available online through Dialog, a commercial vendor. MathSci tapes can also be leased by institutions for campus-wide use.
- MathSci Disc, the 3-disc CD-ROM version of MR and CMP, contains bibliographic data from MR 1940–79, MR from 1980–present and over 80,000 items from CMP.
- MathDoc is the document delivery service enabling researchers to obtain copies of most articles listed in CMP, MR or MathSci.

Further information about these services can be obtained by writing the Ann Arbor or Providence offices, or by consulting advertisements at the end of the monthly issues of MR.

Mathematical Reviews (USPS 333-940) is published monthly plus, in December, an annual author and subject index issue, by the American Mathematical Society, 201 Charles Street, Providence, RI 02904-2213. Second-class postage paid at Providence, RI, and additional mailing offices. Postmaster: Send address changes to Mathematical Reviews, American Mathematical Society, PO Box 6248, Providence, RI 02940-6248.

PREFACE

This annual index of Mathematical Reviews (MR) is included with each subscription and is also available separately. It is also called Volume 25 of the Index of Mathematical Papers (IMP). Volumes 6–9 of IMP are the annual indexes of MR for the years 1974–77 and are available as a set. The 1978 annual index was the first to be included with each subscription. There are cumulative author indexes to MR that cover 1940–59 (Vols. 1–20), 1960–64 (Vols. 21–28) and 1965–72 (Vols. 29–44), subject indexes for 1940–58 (Vols. 1–19) and 1959–72 (Vols. 20–44), and author and subject indexes for 1973–79 (Vols. 45–58) and 1980–84.

The classification scheme used in the present index is the 1991 Mathematics Subject Classification (MSC). A copy of the 1991 MSC is printed in the back of the subject portion of this index.

The entries in the author, key and subject indexes are comprised of all items reviewed in MR during a given year and some items which will not be reviewed by MR but which have appeared in Current Mathematical Publications (CMP). A star (★) preceding a title indicates a book, or other item that is not a periodical, which is reviewed as a whole. The symbol Ⓥ preceding a title indicates that the item is a videocassette. Some titles in this index include the word ARTWORK, indicating special symbols which appear only in printed MR and CMP.

Author index; separate key index

The entries in the author and key indexes give full bibliographic information. These entries are accompanied by review numbers {if available} and classification numbers; secondary classification numbers are given in parentheses. Entries are listed alphabetically by author; entries having several authors are listed in full under each author. Surnames consisting of more than one part (e.g., de Acosta, van der Mee) are listed under the first capital letter. Collections of papers, proceedings, bibliographies, tables, etc. that are edited rather than authored are listed in the key index by title and by "key entry". For example, the publication entitled *Computer intensive methods in statistics* is listed under **Computer intensive methods in statistics** and is also listed under **Conference: Computer Intensive Methods in Statistics** and under the location of the conference. Some monographic series (e.g., American Mathematical Society Translations, Series 2) have entries under the series title in this index.

Arrangement of entries in the author and key indexes

For a given heading (i.e., the primary name of an author, or a title), full entries are listed in order of nominal publication dates; the cross-references are in MR number order after the full entries. The arrangement of each entry is the same as in the heading of its review in MR. The general form for entries is as follows:

Books, Monographs. (Coauthors {if necessary}) ★Title. (Language of original {if necessary}) [English translation of title {if necessary}] Miscellaneous information {edition, editors, translators, series, etc.}. Publisher, city, date. Pagination. ISBN. (Reviewer's name) Review number {if available} Primary classification (Secondary classifications {if necessary}).

Journal article. (Coauthors {if necessary}) Title of article {in English translation if the original title is not in English}. (Language of original {if necessary}. Summary languages {if necessary}) Journal abbreviation {including series number if necessary} volume number(volume number in first series {if given}) (nominal date), issue number {if necessary}, first page–last page (imprint date). (Reviewer's name) Review number {if available} Primary classification (Secondary classifications {if necessary}).

The first three digits of the review number of an item refer to the MR issue in which the review is published and the last five digits refer to its position within that issue. The first two digits after the colon are the general subject classification of the item.

The phrase "EA 93m" after an MR number indicates that an MR erratum or addendum to the review appears at the end of the 93m issue.

Subject index

The entries in the subject index are arranged in classification order. For a given classification, all entries with that classification as a primary appear first, with authored entries appearing before unauthored entries. These are followed by entries with that classification as a secondary. Again, authored entries appear before unauthored entries. Each section under a given classification is arranged in alphabetical order. For each entry, the author(s), title, language, translated title {if necessary} and the review number {if available} appear at the first author only. The entries for subsequent authors are cross-references to the first author. Complete bibliographic information is available in the annual author and key indexes as well as in the MR review.

Cross-references

There are four kinds of cross-references in these indexes:

Name variations. An author's primary name is the variation of the name that MR has chosen on the basis of frequency and currency of usage. Items by a given author are usually listed under the author's primary name. In the author index, cross-references to the primary form are given from sufficiently distinct alternative forms of the author's name.

Authors in other capacities. In the author index, the names of persons associated with an item in a capacity other than that of author (e.g., editor, translator, subject of a biography, etc.) are also listed. In the subject index, such names appear in parentheses. In both indexes these items occur only as cross-references to complete listings.

Key entries. Cross-references for such entries as bibliographies, obituaries and references to special events are made to the authors of the papers in which these items appear, e.g. **Bibliography: Fried, Ervin** *see* **Schmidt, Tamás, 93d:01077**.

Unreviewed entries. Some entries in these indexes have not been reviewed in MR (e.g., items that do not appear to be in final form, or that are at the fringes of MR's scope) although they have been listed in CMP. Unreviewed items appear in the author, key and subject indexes in a format similar to that of reviewed items. For unreviewed items that are part of a collection, the review number in parentheses is a cross-reference to the table-of-contents review, i.e. (see 93x:xxxxx) or (93x:xxxxx). For unreviewed items that are not part of a collection, there is no review number cross-reference.

Transliteration

Since 1983, MR has used the Cyrillic transliteration in use by ANSI, LC, Zbl, ISI, and others. This is also the system used throughout this index. A Cyrillic transliteration table appears at the end of the author/key index.

Names of Chinese authors

The name of a Chinese author appears in the index in Western form. For example, Li Shaokuan will be listed as Li, Shao Kuan, as though the author's name were Shao Kuan Li. The pinyin transliteration is used for mainland Chinese authors and the Wade-Giles transliteration is used for Taiwanese authors.

In an undertaking of this size, errors are inevitable, despite elaborate precautions and checks. The editors of Mathematical Reviews would be very glad to have their attention drawn to errors in this index and also in the earlier indexes.

(Summary) **93f:35169** 35P25 (35J05)

Badzo, M. I. (*with* Vasil'eva, N. V.; Ivanchov, M. I.) Some inverse problems of heat conduction with integral overdetermination. (Ukrainian) *Visnik L'viv. Univ. Ser. Mekh. Mat. No.* 34 (1990), 3–7. 35R30 (35K05)

Bae, Hyeong Ohk (*with* Poston, Timothy; Lee, Chung-Nim) Bifurcation structure of the Eckalbar stock-holding model. *Appl. Math. Comput.* **48** (1992), *no.* 1, 21–43. (Masafumi Sasaki) **93a:90022** 90B05 (58F14, 58F40)

Bae, Jong-Il (*with* Ahn, Doo-Soo; Lee, Seung; Shim, Jae-Sun) A study on estimation of bilinear systems via single term of orthogonal functions. *Control theory, stochastic analysis and applications* (*Hangzhou*, 1991), 236–245, *World Sci. Publishing, River Edge, NJ*, 1991. (*see* **93a:93005**) 93E10

Bae, Sung Han (*with* Kim, Jae Moon; Lee, In-Sok) Cyclotomic units in Z_p-extensions. *Israel J. Math.* **75** (1991), *no.* 2-3, 161–165. (Nancy Childress) **93i:11120** 11R23

— Values of L-functions at $s = 0$. *Arch. Math.* (*Basel*) **58** (1992), *no.* 6, 551–560. (Ted Chinburg) **93i:11133** 11R42 (11R34, 14F20)

— (*with* Hahn, Sang-Geun) On the ring of integers of cyclotomic function fields. *Bull. Korean Math. Soc.* **29** (1992), *no.* 1, 153–163. (David Goss) **93a:11050** 11G09 (11R58)

— (*with* Kang, Pyung-Lyun) On Tate-Drinfel'd modules. *Canad. Math. Bull.* **35** (1992), *no.* 2, 145–151. (David Goss) **93b:11073** 11G09

— On the modular equation for Drinfel'd modules of rank 2. (English summary) *J. Number Theory* **42** (1992), *no.* 2, 123–133. (David Goss) **93g:11060** 11G09 (11G15)

— (*with* Koo, Ja Kyung) On the singular Drinfel'd modules of rank 2. *Math. Z.* **210** (1992), *no.* 2, 267–275. (Ernst-Ulrich Gekeler) **93d:11061** 11G09 (11G15, 11R58)

— (*with* Kang, Pyung-Lyun) Local isogeny theorem for Drinfel'd modules with nonintegral invariants. *Proc. Amer. Math. Soc.* **119** (1993), *no.* 1, 19–25. (David Goss) **93k:11054** 11G09 (14F30)

Baehmann, Peggy L. (*with* Shephard, Mark S.; Flaherty, Joseph E.) A posteriori error estimation for triangular and tetrahedral quadratic elements using interior residuals. The Second World Congress of Computational Mechanics, Part III (Stuttgart, 1990). *Internat. J. Numer. Methods Engrg.* **34** (1992), *no.* 3, 979–996. (Summary) **93a:73076** 73V05

Baek, Ehung G. (*with* Brock, William A.) A nonparametric test for independence of a multivariate time series. *Statist. Sinica* **2** (1992), *no.* 1, 137–156. (Zuzana Prášková) **93d:62085** 62G10 (62M10)

Baek, In Soo (*with* Lee, Hung Hwan) On d-measure and d-dimension. *Real Anal. Exchange* **17** (1991/92), *no.* 2, 590–596. (B. Rodríguez-Salinas) **93f:28005** 28A78 (26A27)

— (*with* Lee, Hung Hwan) Dimensions of a Cantor type set and its distribution sets. *Kyungpook Math. J.* **32** (1992), *no.* 2, 149–152. (William Douglas Withers) **93m:58069** 58F12 (28A78, 28A80, 58F11)

Baek, Jong-il (*with* Kim, Tae-Sung) Relationships among some concepts of multivariate negative dependence. *J. Korean Statist. Soc.* **20** (1991), *no.* 1, 77–83. (Ramesh C. Gupta) **93b:62087** 62H20

Baekler, P. (*with* Mielke, Eckehard W.; Hehl, Friedrich W.) Dynamical symmetries in topological 3D gravity with torsion. *Nuovo Cimento B* (11) **107** (1992), *no.* 1, 91–110. (Carl Brans) **93d:83053** 83D05 (81V17)

Baĭkova, S. O. (*with* Turbaev, B. E.) Local invariant manifolds of a singularly perturbed system. (Russian. Russian summary) *Nonlinear problems in the theory of differential equations* (*Russian*), 9–14, *Akad. Nauk Ukrain. SSR, Inst. Mat., Kiev*, 1991. (Summary) **93i:34082** 34C30 (34E15)

Baer, Detlef Punktverteilungen in Würfeln beliebiger Dimension bezüglich der Maximum-norm. [Point distributions in cubes of arbitrary dimension with respect to the maximum norm] *Wiss. Z. Pädagog. Hochsch. Erfurt/Mühlhausen Math.-Natur. Reihe* **28** (1992), *no.* 1, 87–92. (Béla Uhrin) **93k:52017** 52C10

Baer, M. (*with* Embid, Pedro) Mathematical analysis of a two-phase continuum mixture theory. (English summary) *Contin. Mech. Thermodyn.* **4** (1992), *no.* 4, 279–312. (Summary) **93h:80004** 80A25 (35Q35, 73B30, 76T05)

Baer, Stephen C. The discovery of space frames with fivefold symmetry. *Fivefold symmetry*, 205–219, *World Sci. Publishing, River Edge, NJ*, 1992. (*see* **93i:52002**) 00A69 (52C25)

van Bon, John (*with* Weiss, Richard Mark) A characterization of the groups Fi_{22}, Fi_{23} and Fi_{24}. *Forum Math.* **4** (1992), *no.* 4, 425–432. (Summary) **93d:20035** 20D08

— (*with* Weiss, Richard Mark) An existence lemma for groups generated by 3-transpositions. *Invent. Math.* **109** (1992), *no.* 3, 519–534. (A. S. Kondrat'ev) **93g:20033** 20D08 (05C25)

— Affine distance-transitive graphs with quadratic forms. *Math. Proc. Cambridge Philos. Soc.* **112** (1992), *no.* 3, 507–517. (Arjeh M. Cohen) **93i:05135** 05E20 (11E57, 51A50)

Bona, Jerry L. (*with* Ponce, Gustavo; Saut, Jean-Claude; Tom, Michael M.) A model system for strong interaction between internal solitary waves. *Comm. Math. Phys.* **143** (1992), *no.* 2, 287–313. (Alan Jeffrey) **93e:35086** 35Q35 (76B25, 76V05)

Bóna, Miklós Sur l'énumération des cubes magiques. (English and French summaries) [On the number of magic cubes] *C. R. Acad. Sci. Paris Sér. I Math.* **316** (1993), *no.* 7, 633–636. (Summary) **93k:05010** 05A15 (05B15)

Bonacich, Phillip (*with* Bienenstock, Elisa Jayne) Assignment games, chromatic number, and exchange theory. (English summary) *J. Math. Sociol.* **17** (1993), *no.* 4, 243–259. 90D40

Bonacina, Giuseppe (*with* Martellini, Maurizio; Nelson, Jeanette) Generalized link-invariants on 3-manifolds $\Sigma_h \times [0,1]$ from Chern-Simons gauge and gravity theories. *Lett. Math. Phys.* **23** (1991), *no.* 4, 279–286. (Michael Kapovich) **93d:81112** 81T13 (57M25)

— (*with* Gamba, Andrea; Martellini, Maurizio) Interacting Euclidean three-dimensional quantum gravity. *Phys. Rev. D* (3) **45** (1992), *no.* 10, 3577–3583. (Michael O. Katanaev) **93f:83035** 83C45

Bonacina, Maria Paola (*with* Hsiang, Jieh) On rewrite programs: semantics and relationship with Prolog. (English summary) *J. Logic Programming* **14** (1992), *no.* 1-2, 155–180. (Summary) **93i:68126** 68Q60 (68N17, 68Q42, 68Q55)

Bonadies, Manuelita Barrelling and buckling instabilities of elastic rods. *Utilitas Math.* **41** (1992), 75–90. (Summary) **93a:73052** 73H05 (73K05)

Bonafede, Salvatore A generalized maximum principle for weak subsolutions of degenerate parabolic equations. (Italian. English summary) *Rend. Circ. Mat. Palermo* (2) **41** (1992), *no.* 1, 81–95. (Joachim von Below) **93f:35027** 35B50 (35K65, 35R05)

Bonahon, Francis Ensembles limites et applications. [Limit sets, and applications] *Proceedings of the International Congress of Mathematicians, Vol. I, II* (*Kyoto*, 1990), 599–608, *Math. Soc. Japan, Tokyo*, 1991. (Darryl McCullough) **93d:57020** 57M50 (20H10, 30F40, 30F60, 32G15, 57–02)

Bonami, Aline (*with* Sibony, Nessim) Sobolev embedding in $\mathbf{C}^n$ and the $\overline{\partial}$-equation. *J. Geom. Anal.* **1** (1991), *no.* 4, 307–327. (Frank Beatrous, Jr.) **93a:32024** 32F20 (32F15, 35N15, 46E35)

Bonan, Edmond Comparaison d'un corps convexe avec ses deux ellipsoïdes optimaux. (English and French summaries) [Comparison of a convex body with its two optimal ellipsoids] *C. R. Acad. Sci. Paris Sér. I Math.* **315** (1992), *no.* 5, 557–560. (P. R. Goodey) **93j:52008** 52A38 (52A20, 52A40)

Bonan-Hamada, Catherine M. (*with* Jones, William B.; Magnus, Arne) Para-orthogonal Laurent polynomials. *Approximation theory* (*Memphis, TN*, 1991), 125–135, *Lecture Notes in Pure and Appl. Math.*, 138, *Dekker, New York*, 1992. (H. P. Dikshit) **93k:41009** 41A10

Bonanno, G. *see* **Bonanno, Giacomo**

Bonanno, Gabriele Two theorems on the Scorza Dragoni property for multifunctions. (Italian summary) *Atti Accad. Naz. Lincei Rend. Cl. Sci. Fis. Mat. Natur.* (8) **83** (1989), 51–56 (1990). (Zvi Artstein) **93b:28029** 28B20 (49J45, 54C60)

Bonanno, Giacomo Set-theoretic equivalence of extensive-form games. *Internat. J. Game Theory* **20** (1992), *no.* 4, 429–447. (E. Marchi) **93d:90081** 90D44 (90D10, 90D40)

— Players' information in extensive games. (English summary) *Math. Social Sci.* **24** (1992), *no.* 1, 35–48. (Akira Okada) **93h:90110** 90D06 (90D10, 90D40)

— Rational beliefs in extensive games. (English summary) *Theory and Decision* **33** (1992), *no.* 2, 153–176. (Summary) **93f:90212** 90D43

Bonanos, S. A generalization of the Kerr-Schild ansatz. *Classical Quantum Gravity* **9** (1992), *no.* 3, 697–711. (Shin-ichi Kitamura) **93c:83006** 83C05 (83C20)

Bonardi, M. T. (*with* Casazza, E.; Gallarati, D.) Introduction to conic fibrations. (Italian. English and French summaries) *Studies and research collection* (*Italian*), 3–54, *Coll. Studi Ricerche, VIII, IX, Accad. Ligure Sci. Lett., Genoa*, 1988. (Antonio Lanteri) **93e:14049** 14J40 (14E30, 14J45)

— Linear pencils of varieties with section surfaces of type $K3$. (Italian. English and French summaries) *Studies and research collection* (*Italian*), 57–81, *Coll. Studi Ricerche, VIII, IX, Accad. Ligure Sci. Lett., Genoa*, 1988. (Jean D'Almeida) **93e:14010** 14C21 (14J45)

Bonato, C. A. (*with* Malbouisson, A. P. C.; Thomaz, M. T.) The equivalent Schrödinger equation for the bounce solution. *J. Phys. A* **24** (1991), *no.* 4, 901–907. (From the introduction) **93d:81028** 81Q05 (35Q40)

Bonatsos, Dennis Quantum algebras in nuclear physics. (English summary) *Group theory and special symmetries in nuclear physics* (*Ann Arbor, MI*, 1991), 54–65, *World Sci. Publishing, River Edge, NJ*, 1992. (*see* **93e:81150**) 81V35 (81R50)

— (*with* Daskaloyannis, C.; Kokkotas, K.) WKB equivalent potentials for q-deformed harmonic and anharmonic oscillators. (English summary) *J. Math. Phys.* **33** (1992), *no.* 9, 2958–2965. (Summary) **93f:81034** 81Q20 (81R50, 81S05)

— (*with* Faessler, Amand; Raïchev, P. P.; Roussev, R. P.; Smirnov, Yu. F.) An exactly soluble nuclear model with $SU_q(3) \supset SU_q(2) \supset SO_q(2)$ symmetry. *J. Phys. A* **25** (1992), *no.* 6, L267–L274. (A. Ventura) **93b:81105** 81R50 (81V35)

— (*with* Faessler, Amand; Raïchev, P. P.; Roussev, R. P.; Smirnov, Yu. F.) $B(E2)$ transition probabilities in the q-rotator model with $SU_q(2)$ symmetry. *J. Phys. A* **25** (1992), *no.* 11, 3275–3285. (Summary) **93b:81308** 81V35 (81R50)

— (*with* Daskaloyannis, C.; Kokkotas, K.) Classical potentials for q-deformed anharmonic oscillators. *Phys. Rev. A* (3) **45** (1992), *no.* 9, R6153–R6156. (Summary) **93b:81106** 81R50 (81Q05)

— (*with* Daskaloyannis, C.) Generalized deformed oscillators for vibrational spectra of diatomic molecules. *Phys. Rev. A* (3) **46** (1992), *no.* 1, 75–80. (Summary) **93d:81195** 81V55 (81R50)

Bonatti, Christian Champs de vecteurs analytiques commutants, en dimension 3 ou 4: existence de zéros communs. (English summary) [Commuting analytic vector fields in dimension 3 or 4: existence of common zeros] *Bol. Soc. Brasil. Mat.* (*N.S.*) **22** (1992), *no.* 2, 215–247. (P. Molino) **93h:57044** 57R25

— (*with* Kolev, Boris) Existence de points fixes enlacés à une orbite périodique d'un homéomorphisme du plan. (English and French summaries) [Existence of fixed points linked with a periodic orbit of a homeomorphism of the plane] *Ergodic Theory Dynamical Systems* **12** (1992), *no.* 4, 677–682. (Edward Slaminka) **93j:58112** 58F20

Bonazzola, S. (*with* Pérault, M.; Puget, J. L.; Heyvaerts, J.; Falgarone, E.; Panis, J. F.) Jeans collapse of turbulent gas clouds: tentative theory. (English summary) *J. Fluid Mech.* **245** (1992), 1–28. (Summary) **93i:85005** 85A30 (76E20, 76N15)

Bonci, Luca (*with* Roncaglia, Roberto; Grigolini, Paolo; West, Bruce J.) Chaos and quantum irreversibility. *J. Statist. Phys.* **68** (1992), *no.* 1-2, 321–343. (Summary) **93c:81281** 81V80 (81Q50, 81S30)

— (*with* Bianucci, Marco; Trefan, Gyorgy; West, Bruce J.; Grigolini, Paolo) Brownian motion generated by a two-dimensional mapping. (English summary) *Phys. Lett. A* **174** (1993), *no.* 5-6, 377–383. (Summary) **93m:82030** 82C31

Bond, R. A. B. (*with* Mika, Janusz R.) The implicit Euler method and singular perturbation theory. (English summary) *Computational and applied mathematics, II* (*Dublin*, 1991), 269–275, *North-Holland, Amsterdam*, 1992. (Summary) **93j:65101** 65L05

— (*with* Mika, Janusz R.) Method of approximate inverse for solving equations in Hilbert spaces. *Quaestiones Math.* **15** (1992), *no.* 1, 53–71. (Summary) **93b:47016** 47A50 (65J10)

Bond, Robert J. On the splitting of the Hilbert class field. (English summary) *J. Number Theory* **42** (1992), *no.* 3, 349–360. (Kiyoshi Nagata) **93j:11075** 11R37 (11R32)

Bondar', A. V. (*with* Luk'yanova, E. A.) Sets of σ-monogeneity and criteria for pseudo-analyticity of continuous functions. (Russian. Russian summary) *Akad. Nauk Ukrainy Inst. Mat. Preprint* **1992**, *no.* 7, 28 *pp.* (Summary) **93j:30050** 30G20

Bondar, James V. A Hunt-Stein theorem for amenable semigroups. *Probability measures on groups, X* (*Oberwolfach*, 1990), 39–43, *Plenum, New York*, 1991. (Summary) **93g:62007** 62A05 (62F03)

Bondar', V. A. (*with* Lagno, V. I.; Serov, N. I.) Invariant solutions of eikonal equation simulating process of corrosion. (Russian summary) *Dokl. Akad. Nauk Ukrainy* **1992**, *no.* 5, 24–27, 159. (Summary) **93f:82036** 82C24 (82D15)

Bondarenko, A. A. The structure of the adèle group of the product of algebraic groups. (Russian) *Mat. Zametki* **50** (1991), *no.* 4, 33–37, 157; *translation in Math. Notes* **50**

(1991), *no.* 3-4, 1008–1010 (1992). (Summary) **93f:11033** 11E57 (20G30)

Bondarenko, B. A. Analytic representation and a discrete algorithm for the construction of polynomial solutions of an equation of mixed type and its iterations. (Russian. Russian summary) *Voprosy Vychisl. i Prikl. Mat. (Tashkent) No.* 88 (1990), 20–31, 158–159. 35C10 (35M10)

Bondarenko, M. V. (*with* Poznyak, A. S.) Asymptotic normality and an estimate for the rate of convergence of algorithms for the identification of nonstationary objects. (Russian. Russian summary) *Avtomat. i Telemekh.* **1992**, *no.* 7, 44–55; *translation in Automat. Remote Control* **53** (1992), *no.* 7, *part* 1, 989–999. (Rudolf Kulhavý) **93i:93115** 93E10 (62M10)

— (*with* Tsypkin, Ya. Z.) An optimal algorithm for identification of rapidly time-varying systems. *IEEE Trans. Automat. Control* **37** (1992), *no.* 2, 237–239. (Summary) **93a:93037** 93B30 (93B40)

Bondarenko, N. P. Selfadjoint boundary value problems with a discrete spectrum for some operator-differential equations. (Russian. Russian summary) *Boundary value problems for operator-differential equations (Russian)*, 4–6, *Akad. Nauk Ukrainy, Inst. Mat., Kiev*, 1991. (Summary) **93f:34145** 34L40 (34B05, 34G10, 47E05, 47N20)

Bondarenko, V. A. Estimates for the complexity of combinatorial optimization problems in a class of algorithms. (Russian) *Dokl. Akad. Nauk* **328** (1993), *no.* 1, 22–24. 90C27 (68Q25)

Bondarenko, V. M. On representations of a generalized bundle of semichained sets. (Russian) *Complex analysis, algebra and topology (Russian)*, 9–19, *Akad. Nauk Ukrain. SSR, Inst. Mat., Kiev*, 1990. (L. Bokut') **93b:16020** 16G60
